

GROUP ON CAPACITY BUILDING INITIATIVE  
30 April – 1 May 2012

Boris Williams

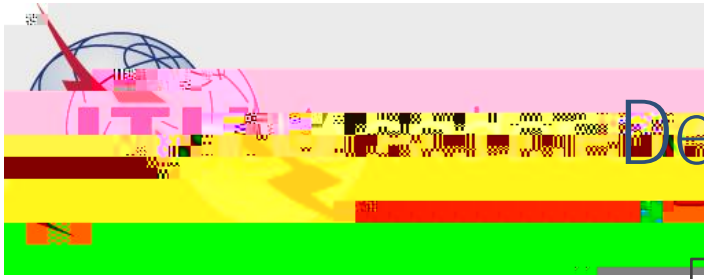

# Historical Background Definition Structure Feature

# Definition

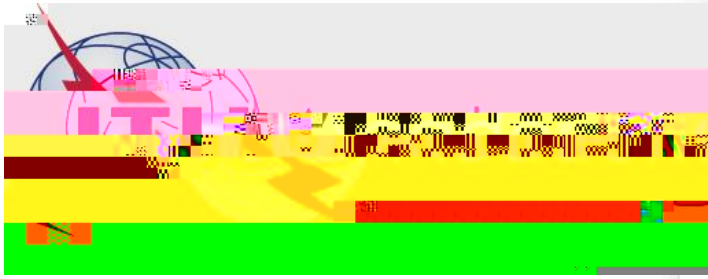

Strategic Level

Operational Level

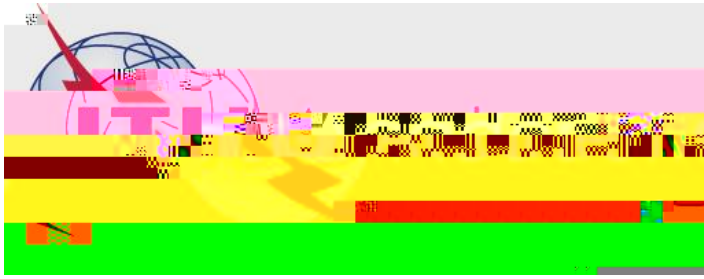

ITU Academy is a platform that serves as an umbrella framework which is supported by sophisticated applications, that overall work to carry out training interventions, designed to implement the capacity building programs over all different regions as a key element for the development of telecommunications throughout the globe. (Put definition on a separate slide. Needs to be reworded. I have a draft for you at the office.)

Home page...

# Training & Events...

Huge administrative task to keep training courses up to date with supporting materials

Requires close cooperation with regional HCB coordinators

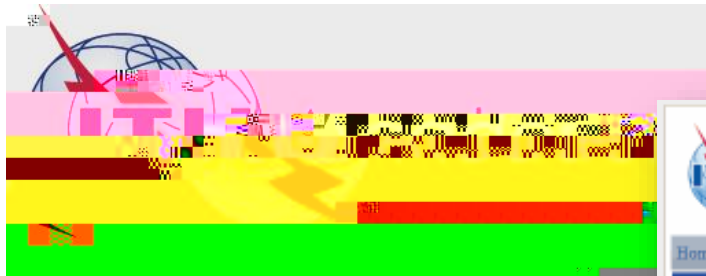

Building knowledge management platform which allows recycling of training materials

Intend to continue to build out topic areas

Requires ongoing help from ITU Subject Matter Experts

# MOODLE

A screenshot of the ITU Academy Moodle administrator interface. The page header includes the ITU Academy logo with the tagline "empowering minds" and a user login status: "You are logged in as ITU Academy Administrator (Logout)". A language dropdown menu is set to "English (en)", and a "Back to Home" button is visible. Below the header, there are navigation links for "Home" and "Site pages". The main content area features a banner for "WORKSHOPS-SEMINARS" with the text "For Top and Middle level managers and engineers" and a search bar. A sidebar on the left contains a menu with items like "Archive", "Business and Management", "Policy and Regulation", and "Technologies and Services". Below the banner, there is a section for "upcoming-events" and a table with columns for "Start Date", "Status ID", and "Course Name". The table contains several rows of data, including course IDs and dates. A "SETTINGS" button is located at the bottom right of the page.
