M

*"I believe that mobile technologies and broadband infrastructure is critical in laying the foundation of a knowledge society... I also recognize that infrastructure alone is not enough to lead us to sustainable development. We therefore need the right policies, regulations and legal framework"*

Committed to connecting the world

M-

Helps to extend the benefits of mobile telephony to all individuals in order to build an inclusive information society with special focus on rural areas;

Stimulates GDP growth and creates employment opportunities;

Provides advantages of wireless technologies at affordable rates;

Has a clear-cut agenda and provides a flexible framework for action.

Committed to connecting the world

Harness mobile networks in fields that foster sustainable development;

Increase the use of mobile services and applications to improve economic activity, particularly in rural and remote areas;

Foster mobile services in not economically profitable areas for operators today;

Create synergies in similar existing initiatives;

Optimize the use of scarce resources;

Forge public-private partnerships and promote large scale multi-stakeholder projects wherever possible.

M-

(PKM/BDT/ITU) will

contribute to the development of m-Education and m-Learning by:

Committed to connecting the world

*"We must optimize, rationalize and maximize the use of telecommunication resources by linking disaster mitigation and rescue resources with sustainable development".*
