ITU Centres of Excellence (CoE) Virtual Global Meeting

Date: 05 – 06 May 2021

Time: 13:00 – 16:00 (CEST)

Meeting objective:

This global meeting is organised as part of ITU's efforts to facilitate collaboration between institutions in the ITU CoE network, as well as a response to the request by CoEs, who have been looking for an opportunity to exchange insights with other CoEs, especially those in other regions. The meeting is therefore organised for CoEs to share experiences, discuss pertinent strategic issues concerning the performance of the network, unearth challenges that are common across the network and identify potential solutions to these challenges.

The main objectives of this meeting are to gather CoEs' inputs into the network's strategic issues, promote standardisation of work across the network and open channels of communication between the centres. This will further strengthen the networks' performance and impact.

Session structure: Mix of plenary and breakout rooms

Output: Report

Platform for the meeting: ZOOM

Thursday 6 May 2021
